

LUMINA BEAUTY

Brand Lift Measurement Study

Measuring Campaign
Effectiveness Through
Consumer Survey Analysis

Introduction

Business Scenario

Lumina Beauty, a fictional luxury skincare brand, launched a new marketing campaign to introduce its latest skincare collection. The marketing team wanted to understand whether the campaign successfully influenced consumer perceptions and purchase behavior.

Project Objective

Evaluate campaign effectiveness through brand lift analysis, identify the strongest performance drivers, and recommend strategies to improve future campaigns through optimized creative, audience targeting, channel selection, and media investment.

Business Problem & Success Metrics

Business Challenge

- *Lumina Beauty recently launched a new skincare campaign.*
- *The marketing team needs to determine whether the campaign influenced consumer perceptions and purchase behavior.*

Business Questions

- *Did the campaign improve brand lift?*
- *Which audiences responded most positively?*
- *Which creative format drove the highest recall?*
- *Which channels performed best?*
- *What campaign strategy should be prioritized next?*

Success Metrics

Ad Recall

Brand Awareness

Brand Favorability

Purchase Intent

By answering these questions and tracking these metrics, we can evaluate campaign effectiveness and make data-driven recommendations for future growth.

Analytics Workflow

1.

SYNTHETIC DATA GENERATION

Generated a realistic brand lift survey dataset with exposed and control groups.

2.

CAMPAIGN PERFORMANCE ANALYSIS

Calculated brand lift metrics and analyzed key marketing KPIs using SQL.

3.

DASHBOARD DEVELOPMENT

Built executive dashboards to measure campaign impact and evaluate audience segments.

4.

MARKETING ACTIVATION

Applied insights to develop AI-assisted campaigns and creative assets.

5.

BUSINESS STORYTELLING

Translated analytical findings into an executive case study and business recommendations.

Campaign Impact Overview

All four Brand metrics improved among exposed consumers, with Ad Recall demonstrating the strongest campaign impact (+37.5pts).

Key Takeaway

The campaign successfully improved consumer perception across the full marketing funnel, supporting continued investment and optimization.

Campaign Performance Drivers

Campaign Performance was driven by higher exposure frequency, influencer-led creative, and strong performance across all advertising channels

Top Creative
Influencer Testimonial

76.9%

Top Channel
Social Video

56.0%

Optimal Frequency
6+ Exposures

90.6%

Ad Recall by Creative Format

Ad Recall by Device

Ad Recall by Exposure Frequency

Recommendations

- Increase campaign frequency toward 4-6 impressions where budget allows.
- Prioritize Influencer Testimonial creatives in future campaigns.
- Continue investing across Social Video, CTV, and Mobile, as all channels demonstrated consistent performance.

Audience Performance Overview

Campaign Performance varied across audience segments, with younger consumers responding most positively overall

Highest Recall
18-24 Age Group
59.5%

Highest Purchase Intent
Female
44.4%

Top Region
Northeast
59.6%

Audience Performance by Age Group				
	Ad Recall	Brand Awareness	Favorability	Purchase Intent
18-24	59.5%	59.1%	56.2%	46.5%
25-34	57.2%	57.5%	48.1%	44.1%
35-44	55.2%	58.9%	51.0%	42.5%
45-54	51.8%	57.9%	50.9%	43.1%
55+	53.5%	56.9%	53.4%	38.6%

Purchase Intent by Gender	
Female	44.4%
Non-binary	42.8%
Male	41.8%

Brand Awareness by Region	
Northeast	59.6%
Midwest	58.8%
South	57.7%
West	56.2%

Audience Insight

Consumers aged 18-24 showed the strongest overall campaign response, achieving the highest recall (59.5%) and purchase intent (46.5%). Brand awareness remained relatively consistent across regions, with the Northeast performing highest overall. Purchase intent varied by gender, with females responding most positively.

EXECUTIVE RECOMMENDATIONS

STRATEGIC RECOMMENDATIONS

Creative

Increase investment in influencer testimonial content.

Channel

Expand Social Video placements.

Frequency

Maintain an optimal exposure frequency of 4–6 impressions.

Audience

Prioritize acquisition campaigns targeting 18–24-year-olds.

Region

Scale campaigns across the Northeast market.

Influencer Testimonial

Conclusion

Key Business Outcomes

- The brand lift campaign successfully increased Ad Recall, Brand Awareness, Brand Favorability, and Purchase Intent among exposed consumers, demonstrating measurable marketing effectiveness.
- Influencer testimonials generated the highest ad recall, while higher exposure frequency significantly improved campaign performance, highlighting the importance of both creative strategy and media planning.
- Audience analysis identified 18–24-year-olds as the strongest-performing segment and revealed consistent engagement across regions, helping prioritize future targeting opportunities.
- These insights support smarter budget allocation, stronger creative decisions, and more effective campaign optimization for future product launches.

Project Reflection

This case study demonstrates how marketing analytics can transform campaign data into actionable business recommendations and creative strategies that support data-driven decision-making.
