

DIVVY BIKES MEMBERSHIP GROWTH STRATEGY

Data-Backed Recommendations
Based on Rider Behavior Analysis

SQL | Tableau | Marketing Strategy
Prepared by Camila Agüero

Business Problem & Objectives

The Challenge

Divvy wants to understand how casual riders differ from annual members and identify opportunities to increase membership adoption.

Project Goal

Analyze rider behavior to uncover insights that can inform targeted membership marketing.

Business Impact

Identify opportunities to improve membership conversions, strengthen customer retention, and support recurring revenue growth.

Key Questions

Rider behavior

- How do ride frequency and trip duration vary between groups?
- Which bike types does each rider group prefer?

Membership Opportunities

- Which rider behaviors present the greatest membership conversion opportunities?
- Which casual riders may be the strongest candidates for targeted membership marketing?

Executive Summary

Key Insights & Growth Opportunity

Ride Volume

76.7%

Of total members are annual members.

Ride Duration

+69%

Longer average ride duration for casual riders.

Bike Preference

54%

Of casual riders use electric bikes.

Recommendation:

Target casual riders with Friday and Saturday membership campaigns that emphasize electric bike access and unlimited recreational riding.

Growth Opportunity:

Focus on converting high-engagement casual riders who already take longer trips and prefer electric bikes

Business Impact:

Increased membership conversion can improve customer retention, create more predictable, create more predictable revenue, and strengthen long-term ridership.

Insight 1: MEMBERS DRIVE THE MAJORITY OF TRIPS

Total Rides by Rider Type — Q1 2025

KEY TAKEAWAYS

- Members generated 320,152 rides (76.65%).
- Casual riders generated 97,504 rides (23.35%).
- Annual members account for over three-quarters of all trips.
- Casual riders represent a smaller share of trips but remain a valuable segment for membership conversion.

Members drive the majority of usage, while casual riders represent a high-potential for targeted membership campaigns.

Insight 2: CASUAL RIDERS TAKE LONGER TRIPS

KEY TAKEAWAYS

- Casual riders’ average ride time is 17.4 min.
- Members’ average ride time is 10.5 min.
- Casual riders are 66% longer than member rides.
- Longer ride times may suggest recreation, sightseeing, or leisure for casual riders.

Casual riders spend 66% more time per ride on average, highlighting an opportunity to target longer-trip riders with membership messaging focused on value and convenience.

Insight 3: CASUAL RIDERS FAVOR ELECTRIC BIKES

KEY TAKEAWAYS

Casual Riders:

52,321 electric-bike rides
45,183 classic-bike rides

Members:

167,818 classic-bike rides
152,334 electric-bike rides

- Casual riders take 54% of their rides on electric bikes, while members take 48%.
- Rider preferences differ by membership type, suggesting opportunities for tailored marketing opportunities and bike availability strategies.

Casual riders are more likely to choose electric bikes, while members slightly favor classic bikes, nighlighting distinct riding prefreneces between the two groups.

Insight 4: CASUAL RIDERS ARE MORE ACTIVE ON FRIDAYS AND SATURDAYS

KEY TAKEAWAYS

Casual Riders:

Highest ridership on Saturday (**19,776** rides).
Friday is a close second with **19,484** rides.

Members:

Highest ridership on Thursday (**53,221** rides).
Weekday riding remains more consistent than weekend riding.

Casual riders are most active on Fridays and Saturdays, making the end of the week an ideal time for targeted membership promotions and recreational riding campaigns.

Key Findings

Annual members generate 76.7% of all rides.

Casual riders show a stronger preference for electric bikes.

Casual riders spend 69% more time per ride on average.

Casual riders are most active on Fridays and Saturdays.

Recommendations

1. Strengthen Member Retention

Continue targeting highly engaged casual riders for conversion.

2. Position Memberships Around Longer Rides

Highlight the value of unlimited rides and extended ride experiences.

3. Promote Unlimited E-Bike Access

Emphasize the benefit riders value most.

4. Launch Weekend-Focused Campaigns

Use time-sensitive offers during peak casual ridership.

Marketing Campaign Recommendations

Campaign concepts designed from rider behavior insights to increase annual membership adoption.

POTENTIAL BUSINESS IMPACT

HIGHER MEMBERSHIP ADOPTION

Convert high-engagement casual riders through targeted, behavior-based campaigns.

MORE PREDICTABLE REVENUE

Annual memberships support recurring revenue and long-term growth.

STRONGER RIDER RETENTION

Consistent riding habits can strengthen long-term engagement and loyalty.

Converting high-engagement casual riders into annual members has the potential to increase recurring revenue, strengthen rider retention, and support long-term business growth.

Future Analysis Opportunities

Opportunities for deeper analysis and cross-functional collaboration to unlock long-term growth.

1 MEMBERSHIP CONVERSION MODELING

Which casual riders are most likely to become annual members?

Use predictive modeling to identify high-value riders and prioritize personalized membership campaigns.

2 MARKETING OPTIMIZATION

Which campaigns and channels generate the highest membership conversions?

Analyze campaign performance to optimize messaging, targeting, and budget allocation.

3 SEASONALITY & RIDER BEHAVIOR

How do weather and seasonal trends influence rider behavior?

Evaluate seasonal ridership patterns to improve campaign timing and operational planning.

4 OPERATIONAL & PERFORMANCE ANALYTICS

How can operational data improve rider experience and decision-making?

Analyze bike availability, station capacity, and service performance to identify operational improvements.

Future analyses can build on these findings to improve membership targeting, campaign performance, and operational planning.
